

Elena Voss

Senior Backend Engineer (Python)

Singapore, SG | +65 5588 2201 | elena.voss@fictionalmail.com | linkedin.com/in/elenavoss-demo

SUMMARY

Senior backend engineer with 8 years building and scaling Python services for high-traffic platforms. Deep hands-on expertise across the full stack requested for this role: FastAPI/Django, PostgreSQL, Redis, Kafka, containerized deployments on AWS with Kubernetes, and mature CI/CD practice. Regularly leads architecture decisions and mentors junior engineers.

SKILLS

Python (8 yrs) | FastAPI | Django REST Framework | PostgreSQL | Redis | Kafka | RabbitMQ | AWS (EKS, RDS, ElastiCache) | Docker | Kubernetes | CI/CD (GitHub Actions, ArgoCD) | System Architecture | Mentoring & Code Review

EXPERIENCE

Senior Backend Engineer — Northfield Data Systems

Singapore | Jun 2020 – Present

- Designed and led migration of a monolithic Django app to FastAPI microservices on Kubernetes (EKS), cutting p95 latency by 46%.
- Built the event-streaming layer on Kafka handling 40M+ events/day, replacing a brittle polling system.
- Own the CI/CD pipeline (GitHub Actions → ArgoCD) used by all 6 backend squads; deploys went from weekly to multiple times daily.
- Mentor 3 junior engineers; run the team's architecture review sessions.

Backend Engineer — Ridgeline Software

Singapore | Jul 2017 – May 2020

- Built REST APIs in Django REST Framework backed by PostgreSQL and Redis caching, serving 2M+ daily active users.
- Containerized all services with Docker; introduced RabbitMQ for async job processing.

Software Engineer — Cobalt Applications

Kuala Lumpur, MY | Aug 2015 – Jun 2017

- Developed Python data-processing pipelines and internal tooling for a 20-person engineering team.

EDUCATION

B.Sc. in Computer Science — National University of Singapore, 2015

CERTIFICATIONS

AWS Certified Solutions Architect – Associate, Certified Kubernetes Application Developer (CKAD)
